

### Amendments to the Claims

This listing of claims replaces all prior versions and listings of claims in the application.

1. (Currently Amended) A method for online re-targeted advertisement selection, comprising:

receiving a description of online activities for a collection of online identities for users accessing one or more affiliate web sites;

identifying a desired behavior, the desired behavior describing a user interaction that indicates that an online identity demonstrating the desired behavior is more likely to be responsive to a re-targeted advertisement;

analyzing the description of online activities to determine whether a particular online identity appearing in the description of the online activities demonstrates the desired behavior;

[[a)] generating a watch list of users to receive re-targeted advertisements based on analyzing the description of online activities; comprising matching received feedback on prior activities of a user at a Web site to selection criteria;

monitoring, in real-time and from the one or more affiliate web sites, information related to user interaction with the one or more affiliate web sites;

[[b)] receiving, from within the monitored information, a request to display advertising content to a [[the]] user;

determining that the user appears in the watch list of users to receive re-targeted advertisements; and

[[c)] selecting, in response to the request, advertising content for display based upon determining that the user appears in the watch list of users to receive re-targeted advertisements. the generated list and the received feedback on prior activities of the user at the Web site.

2. (Original) The method according to claim 1, wherein the request to display advertising content is received from the user via a redirect message from an affiliate Web site.

3. (Currently Amended) The method according to claim 1, wherein the description of online activities ~~received feedback on prior activities of the user~~ is an email message received from the Web site, the email message providing a list of prior activities of the user at the Web site.

4. (Currently Amended) The method according to claim 1, wherein the description of online activities ~~received feedback on prior activities of the user~~ is a file transfer protocol (FTP) message received from the Web site, the FTP message providing a list of prior activities of the user at the Web site.

5. (Currently Amended) The method according to claim 1, wherein the description of online activities ~~received feedback on prior activities of the user~~ is a tag included [[contained]] in a redirect message from the Web site, the tag identifying a specific Web page and indicating a prior activity of the user at the Web site.

6. (Currently Amended) The method according to claim 1, wherein the description of online activities ~~received feedback on prior activities of the user~~ is provided by a proxy server interposed between the user and the Web site, the proxy server providing a list of prior activities of the user at the Web site.

7. (Currently Amended) The method according to claim 1, wherein the description of online activities includes a description of ~~at least one of the prior activities~~ is which Web page was visited on the Web site.

8. (Currently Amended) The method according to claim 1, wherein the description of online activities includes a description of ~~at least one of the prior activities~~ is whether the user made a purchase on the Web site.

9. (Currently Amended) The method according to claim 1, wherein the description of online activities includes a description of ~~at least one of the prior activities~~ is whether the user has become registered on the Web site.

10. (Currently Amended) The method according to claim 1, wherein the description of online activities is the prior activities ~~are listed~~ in a stored table.

11. (Currently Amended) The method according to claim 10, wherein ~~[[a]]~~ the watch list of re-targeted advertisements are created from the stored table.

12. (Previously Presented) The method according to claim 11, wherein a re-targeted advertisement is created for the user if the user made more than one recent visit to the Web site to review a product, but did not purchase the product.

13. (Previously Presented) The method according to claim 12, wherein the re-targeted advertisement created for the user is a coupon to purchase the product at the Web site.

14. (Previously Presented) The method according to claim 11, wherein a re-targeted advertisement is created for the user if the user made a purchase prior to a predetermined time at the Web site, but did not make a purchase subsequent to the predetermined time at the Web site.

15. (Previously Presented) The method according to claim 14, wherein the re-targeted advertisement is a reminder message specifying the Web site.

16. (Previously Presented) The method according to claim 11, wherein a re-targeted advertisement is created for the user if the user made a predetermined amount of purchases within a predetermined time period at the Web site.

17. (Previously Presented) The method according to claim 16, wherein the re-targeted advertisement is a message indicating appreciation to customers of the Web site.

18. (Original) The method according to claim 1, wherein the advertising content is an ad banner.

19. (Currently Amended) A computer system for online re-targeted advertisement selection, comprising:

- a storage device configured to store advertising content associated with a Web site;

- a communications device configured to communicate with the Web site and a user;

- and an advertisement server configured to:

  - receive a description of online activities for a collection of online identities for users accessing one or more affiliate web sites;

  - identify a desired behavior, the desired behavior describing user interaction that indicates that an online identity demonstrating the desired behavior is more likely to be responsive to a re-targeted advertisement;

  - analyze the description of online activities to determine whether a particular online identity appearing in the description of the online activities demonstrates the desired behavior;

  - generate a watch list of users to receive re-targeted advertisements based on analyzing the description of online activities;

  - monitor, in real-time and from the one or more affiliate web sites, information related to user interaction with the one or more affiliate web sites;

  - receive, from within the monitored information, a request to display advertising content to a user;

  - determine that the user appears in the watch list of users to receive re-targeted advertisements; and

  - select, in response to the request, advertising content for display based upon determining that the user appears in the watch list of users to receive re-targeted advertisements.

~~the generated list and the received feedback on prior activities of the user at the Web site receive from the Web site via the communications device feedback on prior activities of the user at the Web site and generate a list of users to receive advertisements, comprising matching the received feedback on prior activities of the user at the Web site to selection criteria, the advertisement server further configured to receive from the user via the communications device a request to display advertising content, the advertisement server further configured to select, in response to the user request, advertising content for delivery from the storage device to the user based upon the generated list and the received feedback on prior activities of the user at the Web site.~~

20. (Original) The system according to claim 19, wherein the request to display advertising content is received from the user via a redirect message from an affiliate Web site.

21. (Currently Amended) The system according to claim 19, wherein the description of online activities ~~received feedback on prior activities of the user~~ is an email message received from the Web site, the email message providing a list of prior activities of the user at the Web site.

22. (Currently Amended) The system according to claim 19, wherein the description of online activities ~~received feedback on prior activities of the user~~ is a file transfer protocol (FTP) message received from the Web site, the FTP message providing a list of prior activities of the user at the Web site.

23. (Currently Amended) The system according to claim 19, wherein the description of online activities ~~received feedback on prior activities of the user~~ is a tag included ~~included~~ ~~[[contained]]~~ in a redirect message from the Web site, the tag identifying a specific Web page and indicating a prior activity of the user at the Web site.

24. (Currently Amended) The system according to claim 19, wherein the description of online activities ~~received feedback on prior activities of the user~~ is provided by a proxy server

interposed between the user and the Web site, the proxy server providing a list of prior activities of the user at the Web site.

25. (Currently Amended) The system according to claim 19, wherein the description of online activities at least one of the prior activities is includes a description of which Web page was visited on the Web site.

26. (Currently Amended) The system according to claim 19, wherein the description of online activities includes a description of at least one of the prior activities is whether the user made a purchase on the Web site.

27. (Currently Amended) The system according to claim 19, wherein the description of online activities includes a description of at least one of the prior activities is whether the user has become registered on the Web site.

28. (Currently Amended) The system according to claim 19, wherein the description of online activities is ~~the prior activities are~~ listed in a stored table.

29. (Currently Amended) The system according to claim 28, wherein [[a]] the watch list of re-targeted advertisements are created from the stored table.

30. (Previously Presented) The system according to claim 29, wherein a re-targeted advertisement is created for the user if the user made more than one recent visit to the Web site to review a product, but did not purchase the product.

31. (Previously Presented) The system according to claim 30, wherein the re-targeted advertisement created for the user is a coupon to purchase the product at the Web site.

32. (Previously Presented) The system according to claim 29, wherein a re-targeted advertisement is created for the user if the user made a purchase prior to a predetermined time at the Web site, but did not make a purchase subsequent to the predetermined time at the Web site.

33. (Previously Presented) The system according to claim 32, wherein the re-targeted advertisement is a reminder message specifying the Web site.

34. (Previously Presented) The system according to claim 29, wherein a re-targeted advertisement is created for the user if the user made a predetermined amount of purchases within a predetermined time period at the Web site.

35. (Previously Presented) The system according to claim 34, wherein the re-targeted advertisement is a message indicating appreciation to customers of the Web site.

36. (Original) The system according to claim 19, wherein the advertising content is an ad banner.

37. (Currently Amended) A machine-readable medium storing instructions adapted to be executed by a processor to:

receive a description of online activities for a collection of online identities for users accessing one or more affiliate web sites;

identify a desired behavior, the desired behavior describing user interaction that indicates that an online identity demonstrating the desired behavior is more likely to be responsive to a re-targeted advertisement;

analyze the description of online activities to determine whether a particular online identity appearing in the description of the online activities demonstrates the desired behavior;

[(a)] generate a watch list of users to receive advertisements based on analyzing the description of online activities, comprising matching received feedback on prior activities of a user at a Web site to selection criteria;

monitor, in real-time and from the one or more affiliate web sites, information related to user interaction with the one or more affiliate web sites;

[[[b)]] receive a request to display advertising content to a [[the]] user; [[and]]

determine that the user appears in the watch list of users to receive re-targeted advertisements; and

[[[c)]] select, in response to the request, advertising content for display based upon determining that the user appears in the watch list of users to receive re-targeted advertisements. the generated list and the received feedback on prior activities of the user at the Web site.

38. (Previously Presented) The medium according to claim 37, wherein the request to display advertising content is received from the user via a redirect message from an affiliate Web site.

39. (Currently Amended) The medium according to claim 37, wherein the description of online activities ~~received feedback on prior activities of the user~~ is an email message received from the Web site, the email message providing a list of prior activities of the user at the Web site.

40. (Currently Amended) The medium according to claim 37, wherein the description of online activities ~~received feedback on prior activities of the user~~ is a file transfer protocol (FTP) message received from the Web site, the FTP message providing a list of prior activities of the user at the Web site.

41. (Currently Amended) The medium according to claim 37, wherein the description of online activities ~~received feedback on prior activities of the user~~ is a tag included ~~included~~ [[contained]] in a redirect message from the Web site, the tag identifying a specific Web page and indicating a prior activity of the user at the Web site.

42. (Currently Amended) The medium according to claim 37, wherein the description of online activities received feedback on prior activities of the user is provided by a proxy server interposed between the user and the Web site, the proxy server providing a list of prior activities of the user at the Web site.

43. (Currently Amended) The medium according to claim 37, wherein the description of online activities includes a description of at least one of the prior activities is which Web page was visited on the Web site.

44. (Currently Amended) The medium according to claim 37, wherein the description of online activities includes a description of at least one of the prior activities is whether the user made a purchase on the Web site.

45. (Currently Amended) The medium according to claim 37, wherein the description of online activities includes a description of at least one of the prior activities is whether the user has become registered on the Web site.

46. (Currently Amended) The medium according to claim 37, wherein the description of online activities is the prior activities are listed in a stored table.

47. (Currently Amended) The medium according to claim 46, wherein the [[a]] list of re-targeted advertisements are created from the stored table.

48. (Previously Presented) The medium according to claim 47, wherein a re-targeted advertisement is created for the user if the user made more than one recent visit to the Web site to review a product, but did not purchase the product.

49. (Previously Presented) The medium according to claim 48, wherein the re-targeted advertisement created for the user is a coupon to purchase the product at the Web site.

50. (Previously Presented) The medium according to claim 47, wherein a re-targeted advertisement is created for the user if the user made a purchase prior to a predetermined time at the Web site, but did not make a purchase subsequent to the predetermined time at the Web site.

51. (Previously Presented) The medium according to claim 50, wherein the re-targeted advertisement is a reminder message specifying the Web site.

52. (Previously Presented) The medium according to claim 47, wherein a re-targeted advertisement is created for the user if the user made a predetermined amount of purchases within a predetermined time period at the Web site.

53. (Previously Presented) The medium according to claim 52, wherein the re-targeted advertisement is a message indicating appreciation to customers of the Web site.

54. (Original) The medium according to claim 37, wherein the advertising content is an ad banner.

55. (Currently Amended) A system for online advertisement selection, comprising:  
means for receiving a description of online activities for a collection of online identities for users accessing one or more affiliate web sites;  
means for identifying a desired behavior, the desired behavior describing user interaction that indicates that an online identity demonstrating the desired behavior is more likely to be responsive to a re-targeted advertisement;  
means for analyzing the description of online activities to determine whether a particular online identity appearing in the description of the online activities demonstrates the desired behavior;

[[ (a) ] means for generating a watch list of users to receive re-targeted advertisements based on analyzing the description of online activities; ~~comprising matching received feedback on prior activities of a user at a Web site to selection criteria;~~

means for monitoring, in real-time and from the one or more affiliate web sites, information related to user interaction with the one or more affiliate web sites;

[[ (b) ]] means for receiving, from within the monitored information, a request to display advertising content to a [[ the ]] user;

means for determining that the user appears in the watch list of users to receive re-targeted advertisements; and

[[ (c) ]] means for selecting, in response to the request, advertising content for display based upon determining that the user appears in the watch list of users to receive re-targeted advertisements, the generated list and the received feedback on prior activities of the user at the Web site.

56. (Previously Presented) The method of claim 5, wherein the tag is a graphic that includes a redirect message to an advertising server.

57. (Previously Presented) The system of claim 23, wherein the tag is a graphic that includes a redirect message to an advertising server.

58. (Previously Presented) The medium of claim 41, wherein the tag is a graphic that includes a redirect message to an advertising server.
